

WhAT'S the BiG IdeA?

Thursday May 16, 2019

Crocker Science Center, Room 208

Registration begins at 2:15 p.m.

General session begins at 2:30 p.m.

What is the Big Idea?

The goal is to inspire researchers to think about how to achieve ambitious and ground-breaking science. Speakers will discuss the genesis of their greatest idea. How did they come up with the problem? How did they come up with the approach? What surprises emerged from the experiments? How did this change our understanding of the cell biological process? *This is a symposium by scientists for scientists.*

Speakers:

Michael Rosen (UT Southwestern)
Biological Condensates

Jeanne Stachowiak (UT Austin)
Intrinsically Disordered Domains Drive Membrane Vesiculation

Manu Prakash* (Stanford University)
Frontiers of Science Lecture Series
Optical Design for a Foldomicroscope

*The symposium is held in conjunction with the College of Science Frontiers of Science Lecture Series.
